

USET is offering a free Certified Lactation Counselor training opportunity.

The [attached document](#) includes detailed information regarding registration, locations, and dates.

USET will reimburse training costs and provide a travel stipend to help cover travel costs. The certification earned from this class can be used to fulfill some of the requirements toward earning the International Board Certified Lactation Consultant (IBCLC) credential.

This is a great opportunity to add or improve skills among Tribal health staff. Continuing education credits are available for nurses, registered dietitians, and other credentialed staff.

Please see the [attachment](#) for more details and contact Vicki French at vfrench@usetinc.org or 615-467-1578 if you have any questions.
