

3. OPPORTUNITIES: REQUEST FOR TRIBAL PROJECTS

NAFOA has recently been in conversations with an investor interested in working within Indian Country. The investor is interested in financing any project within Indian Country that would have a high positive impact for the community as well as provide some return-on-investment. They are looking to invest their capital long-term. While they are not tied to any specific sector or investment type, they mentioned particular interest in renewable energy projects in the southwest, opportunity zone investments, and real estate. NAFOA plans to discuss a handful of tribal projects that will best fit the interests of the investor.

If your tribe is interested in submitting a project for review, [please fill out this brief form](#). We only need very basic information at this point, and will follow up for more information if needed.
