

INTERESTED IN ATTENDING SWAMP SCHOOL?

ATTEND THE ONLINE WETLAND DELINEATION TRAINING

The Swamp School's Basic Wetland Delineation Training (WDT) is a unique blend of live, interactive, and online modules paired with local hands-on fieldwork. The local fieldwork requires the use of vegetation field guides, a Munsell soil color chart, and some type of digging instrument (augur/spade) to complete. USET is able to purchase Munsell soil charts for all participants upon request.

STARTING APRIL 12, 2021

- The courses are self-paced and require three hours of work each week
- The training runs for 12 consecutive weeks
- 36 Credit Hours will be awarded and can be used for Professional Wetland Scientist certifications

THE FOLLOWING TOPICS WILL BE COVERED:

- Waters of the US and Courts
- NWI Mapping
- Vegetation
- Hydrology
- Soils
- Regional Data Form
- Site Description
- Health and Safety
- Wetland Data Collection
- Wetland Delineation

IMPORTANT REGISTRATION INFORMATION

- USET will be registering eligible participants into swamp school and will be covering the registration fees
- The course is made available at no cost to anyone working on wetlands related projects for USET Tribal Nations, on a first come first serve basis
- Participants must have a local wetland site where they can work for this course
- Participants must register with USET by April 5, 2021
