2022 TRIBAL ENTERPRISE DIRECTORY

Acknowledgements
There are many to acknowledge who helped to make the USET Tribal Enterprise Directory a reality. Much gratitude is extended to the USET Board of Directors, USET Tribal Leaders, representatives on USET's Economic Development and Entrepreneurship Committee, and the many, many Tribal employees who work tirelessly for the advancement of Tribal economies. It is their work and dedication that provides guidance, direction, and the basis for the continued development and build out of the economic development programmatic work at USET. Appreciation is also extended to the staff and partners from the U.S. Economic Development Administration (EDA) for their investment to make this document possible. Last but not least, thanks is extended to all USET staff that took part in the drafting, design, and formatting of the finished Directory.

Background

Established in 1969, the United South and Eastern Tribes, Inc. (USET) is a non-profit, inter-Tribal organization serving thirty-three (33) federally recognized Tribal Nations from the Northeastern Woodlands to the Everglades and across the Gulf of Mexico. USET is dedicated to enhancing the development of Tribal Nations, improving the capabilities of Tribal governments, and improving the quality of life for Indian people through a variety of technical and supportive programmatic services. Directing USET's work are the shared goals to protect the inherent sovereignty rights of all Tribal Nations, to pursue opportunities that enhance Tribal nation building, and to ensure that the U.S. upholds its sacred trust and treaty responsibilities and obligations to Indian country. As part of the organization's long-term strategic planning, USET's Office of Economic Development was started in 2015 and tasked with identifying economic development activities throughout the USET membership. Guided by a comprehensive economic development strategy, USET economic development goals are based around supporting a thriving economic climate, nation rebuilding and sovereignty protection, capacity building, education and workforce development, partnership and collaboration, and quality of life and place.

Purpose of the Directory

With more than 600 Tribal Nation enterprises, businesses, and economic development opportunities listed, this directory introduces business opportunities and activities throughout the USET membership. The purpose of USET's Tribal Enterprise Directory is to 1) inform USET membership what economic development activities are currently being offered by Tribal Nations; and 2) to offer contact information for these initiatives to promote nation-to-nation trade and/or economic partnerships to facilitate the development of strong Tribal economies.

Structure of the Directory

The Directory is listed first alphabetically by industry sector found amongst the USET membership. Initial sectors were identified throughout the USET Comprehensive Economic Development Strategy (CEDS) research phase as economic clusters. Additional sectors have been identified as new Tribally owned enterprises have been created and new economic clusters have emerged. Industry sectors were also selected and based heavily on description of industries in the North American Industry Classification System (NAICS). NAICS is the standard used by Federal statistical agencies in classifying business establishments for the purpose of collecting, analyzing, and publishing statistical data related to the U.S. business economy.

The Directory currently classifies Tribal enterprises into 20 industry sectors. The Directory sectors and the distinguishing activities of each are:

- Agriculture – Agricultural production and agricultural support activities
- Arts and Culture – Establishments that provide historical, culture, and educational benefits
- Communication and Media – Publishing industries, including traditional publishing, the motion picture and sound recording, broadcasting and telecommunications
- Construction – Construction of buildings and engineering projects (e.g., highways and utility systems)
- Convention and Meeting Spaces – Establishments primarily engaged in organizing, promoting, and/or managing business and trade shows, conventions, conferences, and meetings
- Development Corporations and Holdings – Holding of securities of companies and enterprises
- Energy and Utility – Provision of utility services, including electric power, heat, natural gas, steam supply, water supply, and sewage removal
- Entertainment and Amusement – Establishments that operate facilities or provide services to meet varied entertainment interests of patrons
- Finance – Establishments engaged in financial transactions and/or in facilitating financial transactions
- Food and Beverage – Food services and food and/or beverage consumption products
- Health Care and Social Assistance – Establishments providing health care and social assistance for individuals
- Hospitality – Establishments engaged in providing short-term lodging facilities
- Information Technology – Establishments primarily engaged in computer hardware, software, and communication technologies
- International and Domestic Investment Properties – Holdings or investments of properties or operations inside and outside the United States
- Natural Resources – Activities revolving around producing and utilizing natural resources
- Professional Services – Establishments that specialize in performing professional, scientific, and technical activities
- Real Estate and Housing – Renting, leasing, or otherwise allowing the use of tangible holdings and related services
- Recreation – Activities operating or providing services for recreational interests of patrons

- Retail and Trade – Establishments engaged in retailing merchandise
- Sports Teams and Clubs – Ownership of professional or semiprofessional sports teams or clubs

The Directory also includes three index listings to help promote speedier search of Tribal enterprises. Indexes are by the following groupings:

- Location
- Small Business Administration (SBA) 8(a) Program Participants
- Tribal Nation

Definition of a Tribal Enterprise

The USET Tribal Enterprise Directory is a listing of Tribally owned enterprises. An enterprise is a statistical unit defined as the smallest operating entity for which records provide information on the cost of resources—materials, labor, and capital—employed to produce the units of output. The output may be sold to other establishments and receipts or sales recorded, or the output may be provided without explicit charge, that is, the good or service may be ''sold'' within the company itself. Enterprises will typically have a single physical location where business is conducted or where services or industrial operations are performed (e.g., a factory, mill, store, hotel, movie theater, mine, farm, airline terminal, sales office, warehouse, or central administrative office). There are cases where records identify distinct and separate economic activities performed at a single physical location (e.g., shops in a hotel). These retailing activities, operated out of the same physical location as the hotel, are identified as separate establishments. Tribal enterprises listed are considered firms that are owned in whole or in majority by a federally recognized Tribal Nation. Inclusion in this Directory does not discriminate or make any distinction of how these firms are incorporated, either through Section 17, LLC, or any other structure.

Determining an Establishment's Industry Classification

The specific industries listed in the USET Tribal Enterprise Directory are shared from two sources. First, the USET CEDS document identifies primary economic development clusters among the USET member Tribal Nations. This list of economic clusters was then expanded using industries listed in the North American Industry Classification System (NAICS) guide. An enterprise is classified in an industry when its primary activity meets the definition for that industry. Because enterprises may perform more than one activity, some enterprises might be listed more than once based on the activities of the establishment.

Updates to the Directory

The USET Tribal Enterprise Directory is not meant to be exhaustive and therefore might not include all enterprises. In addition, with changing market forces, some enterprises listed might no longer be viable and open. Please notify the USET Office of Economic Development of any edits or changes that should be made. As a result, USET will update this Directory on schedule and will post subsequent versions of the Directory on the USET website at www.usetinc.org.

Declaration Contrary to Endorsement

USET provides this Tribal Enterprise Directory as a service to USET members and the public. The Directory is intended to be a resource for Tribal enterprises and business activity within the USET membership. Inclusion in this business resource guide is strictly voluntary. USET does not solicit for any individual business to place an entry in this directory, nor is USET responsible for the content on external websites. USET does not endorse the information, content, presentation or accuracy of any external site linked. Links to other websites found in the Tribal Enterprise Directory are provided to assist in locating information. USET is not responsible for, and expressly disclaims all liability for, damages of any kind arising out of use, reference to, or reliance on any information contained within the business resource or any link contained within the guide. While the information contained within the Directory is periodically updated, no guarantee is given that the information provided printed here or available on the USET website is correct, complete, and up to date. Your connection to any linked site is at your own risk. In addition, USET does not endorse or make claim of support of any businesses listed. Procurement policies and purchasing policies should be followed prior to engaging in any business agreements. Entities listed in this directory are for educational purposes only. USET is not responsible for, and expressly disclaims all liability for, damages of any kind arising out of your use of or reliance on any of the resources, businesses or vendors mentioned.

The establishments in this sector are often described as farms, ranches, dairies, greenhouses, nurseries, orchards, or hatcheries. The sector includes agricultural production and agricultural support activities. Agricultural production includes establishments performing the complete farm or ranch operation, such as farm owner-operators and tenant farm operators. This sector also comprises establishments that support agricultural activities including Tribal food system programs, community gardens, and farmers markets that serve multiple community purposes.
