

Heart Attack

A heart attack is when blood flow from the heart is blocked or reduced. Heart attack symptoms can look different in men and women. It is important to seek immediate medical treatment and call 9-1-1, when experiencing signs of a heart attack. Seeking immediate medical treatment increases positive outcomes and lessens damage to your heart.

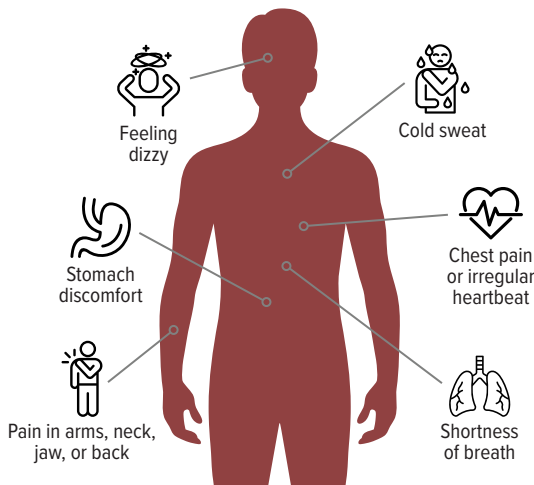

Symptoms in men:

- Nausea
- Vomiting
- Jaw, neck, or back pain
- Squeezing chest pressure or pain
- Shortness of breath

Symptoms in women:

- Nausea
- Vomiting
- Jaw, neck, or back pain
- Chest pain, but this is not true in all cases
- Pain or pressure in the lower chest or upper abdominal area
- Shortness of breath
- Extreme fatigue
- Indigestion
- Fainting
