

## **Climate Change Science and Modeling**

The USDA Forest Service Climate Change Resource Center has released a new interactive online education module on basic climate change science and climate modeling. The module was designed to make climate change science approachable to the general public and to provide flexibility for busy professionals, but also to facilitate a greater level of understanding and depth through interactive features. The online module can be found at: [www.fs.fed.us/ccrc/climate-basics/education.shtml](http://www.fs.fed.us/ccrc/climate-basics/education.shtml).
